Role Of Trade In Ending Poverty

Role Of Trade In Ending Poverty

Trade will have an important role at the global level in generating the growth necessary for reducing extreme poverty to 3 percent and boosting prosperity for the poorest 40 percent by 2030. To identify the most important challenges that exist in maximizing the positive impact of trade on poverty, we need to understand who the poor are, where they are, and what economic activities they undertake. To this end, the study highlights particularly relevant dimensions of poverty: rural poverty in remote areas, informality, fragile and conflict situations, and women. For each of these issues, this study considers the main traderelated barriers and challenges, along with policy responses to address them. It shows the importance of the multilateral trading system and of the Doha Round, as well as the important role of the WBG and WTO in promoting coherence and implementing trade policies in a way that delivers the greatest possible benefits for the poor.
