Building Virtual Pentesting Labs for Advanced Penetration Testing - Second Edition

Kevin Cardwell

Building Virtual Pentesting Labs for Advanced Penetration Testing - Second Edition Kevin Cardwell

Key Features

- Learn a systematic process for professional security and penetration testing
- Explore and build intricate architectures that allow you to emulate an enterprise network
- Examine and perform research to identify the latest vulnerabilities and, build a lab and test them!
- Learn methods to bypass common enterprise defenses and leverage them to test the most secure environments.

Book Description

In this book you will be introduced to a proven professional security and penetration testing methodology that has trained thousands of professional testers. Your experience from reading this book will prepare you for participation in professional security testing teams, both as a red team and a blue team member. Within the book you will learn how to take advantage of the power of virtualisation to build a multi-layer enterprise architecture and then deploy targets to test inside it. Additionally, you will learn a systematic process for discovering vulnerabilities and then a way to test these on your own private network. By practising the techniques throughout the book, you will be able to hone and enhance your skills in professional security and penetration testing.

Building Virtual Pentesting Labs for Advanced Penetration Testing will teach you the process of how to build your own labs and a proven process to test these labs that is currently used in Industry by global penetration testing teams. You will start with an introduction to professional security testing and deciding where pen testing fits; then you will be introduced to proven leading Industry testing methodologies.

Once the introduction has completed, you will start building the machines; once you have built them you will learn how to build and test layered architectures. After you have mastered the layers you will plan specific attacks based on the platforms you are going up against. The book will show you a process for discovering new vulnerabilities for systems and networks, and how to apply these to your developed range and discover what the vulnerability means to your potential clients.

Building Virtual Pentesting Labs for Advanced Penetration Testing uses extensive labs and illustrations to take you from the beginning (building and attacking an enterprise architecture) to methods to bypass and avoid common enterprise architecture defences.

What you will learn

- Proven security testing and penetration testing techniques
- How to build multi-layered complex architectures to test the latest network designs
- Applying a professional testing methodology
- Determining whether there are filters between you and the target and how to penetrate them
- How to deploy and then find weaknesses in common firewall architectures.
- Advanced techniques to deploy against hardened environments

- Methods to circumvent endpoint protection controls

About the Author

Kevin Cardwell currently works as a freelance consultant and provides consulting services for companies throughout the world. He developed the Strategy and Training Development Plan for the first Government CERT in the country of Oman and developed the team to man the first Commercial Security Operations Center there. He has worked extensively with banks and financial institutions throughout Middle East, Africa, Europe, and the UK. He currently provides consultancy to Commercial companies, governments, major banks, and financial institutions across the globe. He is author of Backtrack: Testing Wireless Network Security, Building Virtual Pen Testing Lab for Advanced Penetration Testing First Edition, and Advanced Penetration Testing of Highly Secured Environments 2nd Edition.

From reader reviews:

Charles Wright:

This Building Virtual Pentesting Labs for Advanced Penetration Testing - Second Edition book is just not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is actually information inside this e-book incredible fresh, you will get details which is getting deeper anyone read a lot of information you will get. This specific Building Virtual Pentesting Labs for Advanced Penetration Testing - Second Edition without we recognize teach the one who examining it become critical in thinking and analyzing. Don't possibly be worry Building Virtual Pentesting Labs for Advanced Penetration Testing - Second Edition can bring if you are and not make your bag space or bookshelves' come to be full because you can have it inside your lovely laptop even phone. This Building Virtual Pentesting Labs for Advanced Penetration Testing - Second Edition having good arrangement in word and layout, so you will not truly feel uninterested in reading.

Harriet Dupree:

Spent a free the perfect time to be fun activity to complete! A lot of people spent their down time with their family, or all their friends. Usually they carrying out activity like watching television, about to beach, or picnic within the park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your current free time/ holiday? Could possibly be reading a book might be option to fill your totally free time/ holiday. The first thing you ask may be what kinds of e-book that you should read. If you want to test look for book, may be the reserve untitled Building Virtual Pentesting Labs for Advanced Penetration Testing - Second Edition can be good book to read. May be it is usually best activity to you.

Alta Favors:

People live in this new morning of lifestyle always try and and must have the time or they will get lots of stress from both daily life and work. So , once we ask do people have free time, we will say absolutely indeed. People is human not just a robot. Then we question again, what kind of activity are you experiencing when the spare time coming to anyone of course your answer will certainly unlimited right. Then ever try this one, reading ebooks. It can be your alternative throughout spending your spare time, typically the book you have read is usually Building Virtual Pentesting Labs for Advanced Penetration Testing - Second Edition.

Royce Woods:

You can spend your free time you just read this book this book. This Building Virtual Pentesting Labs for Advanced Penetration Testing - Second Edition is simple bringing you can read it in the park, in the beach, train along with soon. If you did not get much space to bring often the printed book, you can buy the particular e-book. It is make you easier to read it. You can save typically the book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.
