Tinker Thinkers Augmented Reality Edition: Augmented Reality Edition Susan Gardner, Amy Leask
Ah, there's nothing like a good argument! No, we don't mean the kind of argument where you scrunch up your face, get angry, and stomp around. We mean the kind of argument where you share your thoughts with others, and explain the reasons behind them.

Meet the Tinker Thinkers! Equipped with the tools of logic and reason, this team of pint-sized ponderers build their way to better ideas. Join them as they explore the parts of an argument, and learn new ways to test its strength. You'll find that building an argument is one of the most important skills a person can learn...and it can be fun too! Ages 7 -10.

Explore the augmented reality edition of Tinker Thinkers using your iOS or Android device, and watch the team leap off the page! Purchase the book, follow the download instructions for a free app, and your little thinker is on their way to a more engaging reading experience. Learning to argue has never been this cool!

Praise for...

“Many readers, both young and old, are sure to enjoy innovative ideas like “sneaky silent arguments” both in terms of how these can be discovered (identified) and countered. The inclusion of these “sneaky silent arguments” is not only a clever way to engage children, but also a helpful tool for anyone interested in uncovering the many ways such sneaky tricks are embedded in everyday discourse as well as performed in political and commercial advertising. Drawing our attention to such tricks of the trade is something this kids book is great at, and is certainly a lesson we adults could probably use a bit more instruction in.”

- Analytic Teaching and Philosophical Praxis

“It should matter to us that children learn to think for themselves. And in order to become adept at doing so, children need practice. Tinker Thinkers is a great place to start. Colorful, fun and engaging, the book can help foster some basic reasoning and logic skills, supporting childrens' development into more self-reflective and proficient thinkers.” - Philosophy Now Magazine
