The Puzzle of Autism: Putting It All Together- A Guide to Transforming the Treatment of Autism

Amy Yasko, Garry Gordon

A Guide to Transforming the Treatment of Autism. For Parents and Physicians. "Any parent or physician reading this book should be excited and hopeful. This protocol has been a tremendous benefit to a number of children. It has worked for children of all ages, and no, this protocol does not require that your child be less than five years old. Individuals up to 30 years of age have seen benefits from this program. However, it is not a magic bullet. For most children there is no magic bullet. It is a matter of perseverance, and slowly working your way through the program to gradually reverse the layers of damage, and put all of the complex pieces back together and in working order. Yes, it can be done, and it has been done. There are always the "quick fix" kids. The ones that only need a few supplements or just the first phase of the detoxification program to be on their way to recovery. We all hear about those cases, and it seems like everyone except YOUR child falls into that category. The reality is that most children do not fall into the quick fix category. But there is hope for every child. So, take a deep breath, get ready for the marathon, pace yourself, but above all else don't give up on your children."
