Algae Biotechnology: Products and Processes (Green Energy and Technology)

Algae Biotechnology: Products and Processes (Green Energy and Technology)

This book examines the utilization of algae for the development of useful products and processes with the emphasis towards green technologies and processes, and the requirements to make these viable. Serving as a complete reference guide to the production of biofuels and other value added products from micro and macro algae, it covers various aspects of algal biotechnology from the basics to large scale cultivation, harvesting and processing for a variety of products. It is authored and edited by respected world experts in the field of algal biotechnology and provides the most up to date and cutting edge information on developments in the field. Over the past decade there has been substantial focus and related literature on the application of algal biomass for the generation of novel processes and products. 'Algae Biotechnology: Products and Processes' encompasses a holistic approach to critically evaluating developments in the field of algal biotechnology whilst taking into account recent advances and building on the body of knowledge. Aspects of the effects of harmful algae are also discussed, as well as the potential commercial application of algal biotechnology, the techno-economic feasibility of algal biodiesel production and the use of genetic and metabolic engineering for the improvement of yield. Other bioenergy sources such as alcohol fuels, aviation fuels, biohydrogen and biogas are also covered. This book is intended for postgraduates and researchers working in the biofuels and algal industry; it constitutes ideal reference material for both early stage and established researchers.

From reader reviews:

Jose York:

The guide untitled Algae Biotechnology: Products and Processes (Green Energy and Technology) is the publication that recommended to you to see. You can see the quality of the guide content that will be shown to an individual. The language that author use to explained their ideas are easily to understand. The article author was did a lot of investigation when write the book, and so the information that they share to you is absolutely accurate. You also will get the e-book of Algae Biotechnology: Products and Processes (Green Energy and Technology) from the publisher to make you more enjoy free time.

Andrew Sessions:

Playing with family inside a park, coming to see the water world or hanging out with buddies is thing that usually you might have done when you have spare time, after that why you don't try point that really opposite from that. One particular activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Algae Biotechnology: Products and Processes (Green Energy and Technology), you could enjoy both. It is great combination right, you still desire to miss it? What kind of hang type is it? Oh seriously its mind hangout men. What? Still don't understand it, oh come on its referred to as reading friends.

Alexander Ratcliff:

In this age globalization it is important to someone to obtain information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of sources to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. Typically the book that recommended to your account is Algae Biotechnology: Products and Processes (Green Energy and Technology) this reserve consist a lot of the information of the condition of this world now. This kind of book was represented how does the world has grown up. The terminology styles that writer value to explain it is easy to understand. The actual writer made some study when he makes this book. That is why this book suited all of you.

Frances Drury:

Beside this kind of Algae Biotechnology: Products and Processes (Green Energy and Technology) in your phone, it might give you a way to get nearer to the new knowledge or data. The information and the knowledge you might got here is fresh through the oven so don't always be worry if you feel like an older people live in narrow village. It is good thing to have Algae Biotechnology: Products and Processes (Green Energy and Technology) because this book offers to your account readable information. Do you occasionally have book but you do not get what it's facts concerning. Oh come on, that will not end up to happen if you have this in your hand. The Enjoyable agreement here cannot be questionable, such as treasuring beautiful

island. Techniques you still want to miss this? Find this book along with read it from at this point!
