Canon of Insolation and the Ice-Age Problem

Milankovic (Milankovitch) Milutin

Canon of Insolation and the Ice-Age Problem Milankovic (Milankovitch) Milutin

The original edition of "The Canon" was published in German (1941). It was translated into Serbian (1997), into English in Jerusalem (1969), and finally into English in Belgrade (1998). The present review is based on Balgrade translation edited by the Textbook Publishing Company, Belgrade. The book has 634 pages, 57 illustrations, 28 tables and 1338 equations. This paper seeks to give a general overview of Milankovich's accomplishments. The account does not follow the historical order of his discoveries, but the order as they appear in "The Canon". The translations quoted in this paper are from the English edition of 1998. "The Canon" was an interdisciplinary work between mathematics, astronomy, geophysics and geology. With astronomical methods, Milankovich solved the problems of the secular perturbations in the movements of the Earth; with geophysical methods he solved the law of the Earth's insolation; while with geological methods he studied succession and the history of Quaternary glaciations.
