Essays on the Industrial Revolution (Varioum Collected Studies Series) Sidney Pollard, Colin Holmes
This volume has three main themes. First, there is the concept of the Industrial Revolution and its main characteristics, and the author defends both the term and the notions behind it against attempts to play down their significance. A particular interest is the comparison of what happened to Britain with similar processes in other European countries. The second theme is the set of problems facing the early entrepreneurs and managers. Their difficulties, as pioneers in the economic as well as the social sphere, are often underrated, and are here explored in detail. Last, there is an emphasis on the characteristic feature of industrialisation as a regional phenomenon, and on the significance of particular regions in the entire process. All three themes have called forth extended debate, in which these essays have played an important part.
