**A PI, a lone mountain, and a mystery that will rock all of humankind.**

In 1993 a remote North Carolina mountaintop is the site of an event destined to change the course of mankind and Earth itself, discovered and investigated by Pat Vogt, a junior member of The Bureau of Investigation of Unidentified Flying Objects. A slight woman with a hard streak of determination that would put larger men to shame, Pat insists on being dropped into the remote wilderness area, a feat her pilot thinks is insane, but for Pat, it's all in a day's work. It brings her face to face with Earth's first verifiable UFO and sets into motion a series of events that not only threatens her life, but destroys her career.

Ten years later, Pat, now a Private Investigator, returns to the nearby town of Waynesboro to try to put the nightmarish events that happened on that mountain top to rest. Waynesboro is larger now, but the mountains are the same and the mystery surrounding them just as puzzling. A chance encounter leads her to Allan, the town's small animal vet with secrets of his own.

Orrin Jason Bradford's style has been compared to the "early works of Dean Koontz and the late great Michael Crichton." FreeForm is the first book in an Alien Invasion Romance Series with a genetic engineering theme.
