GSL Engineering Geology Special Publication 26 - Earthworks in Europe (Geological Society Engineering Geology Special Publication) T A Radford

This volume provides an overview of developments in the design and construction of earthworks, in particular those associated with transport infrastructure. It includes case studies from across Europe, which summarize current design standards and national codes of practice. Geotechnical risk and performance are addressed with discussions on the long-term stability of cuttings and embankments, the causes of slope failure, and a variety of stabilization techniques including the introduction of drainage measures and electrokinetic geosynthetics. There is guidance on the specification for material testing, the practice of soil improvement, ground treatment, the reuse of materials and the use of engineered fill. Finally consideration is given to asset management and geotechnical data management, the effects of climate change and environmental impact so that performance-based design can be combined with carbon footprint and cost analysis.

The Geological Society of London

Founded in 1807, the Geological Society of London is the oldest geological society in the world, and one of the largest publishers in the Earth sciences.

The Society publishes a wide range of high-quality peer-reviewed titles for academics and professionals working in the geosciences, and enjoys an enviable international reputation for the quality of its work.

The many areas in which we publish in include:

- Petroleum geology
- Tectonics, structural geology and geodynamics
- Stratigraphy, sedimentology and paleontology
- Volcanology, magmatic studies and geochemistry
- Remote sensing
- History of geology
- Regional geology guides

From reader reviews:

Ida Torres:

The knowledge that you get from GSL Engineering Geology Special Publication 26 - Earthworks in Europe (Geological Society Engineering Geology Special Publication) will be the more deep you looking the information that hide into the words the more you get thinking about reading it. It does not mean that this book is hard to know but GSL Engineering Geology Special Publication 26 - Earthworks in Europe (Geological Society Engineering Geology Special Publication) giving you joy feeling of reading. The writer conveys their point in specific way that can be understood simply by anyone who read it because the author of this reserve is well-known enough. That book also makes your own personal vocabulary increase well. Therefore it is easy to understand then can go together with you, both in printed or e-book style are available. We propose you for having this kind of GSL Engineering Geology Special Publication 26 - Earthworks in Europe (Geological Society Engineering Geology Special Publication) instantly.

Paul Dixon:

You may spend your free time to see this book this reserve. This GSL Engineering Geology Special Publication 26 - Earthworks in Europe (Geological Society Engineering Geology Special Publication) is simple to create you can read it in the park your car, in the beach, train and soon. If you did not have got much space to bring the printed book, you can buy the particular e-book. It is make you better to read it. You can save often the book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.

Juan Gilbert:

What is your hobby? Have you heard which question when you got college students? We believe that that concern was given by teacher with their students. Many kinds of hobby, Everyone has different hobby. So you know that little person just like reading or as studying become their hobby. You must know that reading is very important and book as to be the thing. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You see good news or update concerning something by book. Different categories of books that can you choose to adopt be your object. One of them is actually GSL Engineering Geology Special Publication 26 - Earthworks in Europe (Geological Society Engineering Geology Special Publication).

Cara Shaver:

Reading a book make you to get more knowledge as a result. You can take knowledge and information coming from a book. Book is published or printed or highlighted from each source in which filled update of news. In this particular modern era like now, many ways to get information are available for an individual. From media social like newspaper, magazines, science book, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just

seeking the GSL Engineering Geology Special Publication 26 - Earthworks in Europe (Geological Society Engineering Geology Special Publication) when you needed it?
