Post-parametric Automation in Design and Construction

Alfredo Andia, Thomas Spiegelhalter

Post-parametric Automation in Design and Construction Alfredo Andia, Thomas Spiegelhalter
Book Information Automation, a mixture of algorithms, robots, software, and avatars, is transforming all types of jobs and industries. This book responds to one critical question for the design and construction industry: "how are architects, engineers, and contractors using information technology to further automate their practices?" Addressing the use of new digital technologies, particularly parametric automation for design and construction in the building industry, this book looks at how technologically advanced architectural and engineering practices are semi-automating their design processes by using sophisticated algorithms to transform their workflows. The book also documents a set of firms that are further advancing automation by using pre-fabrication, modularization, and custom designs via robotics. Market Engineers; Architects; Building Designers; Construction Managers; Contractors; & Developers

From reader reviews:

Sally Watts:

The e-book with title Post-parametric Automation in Design and Construction has a lot of information that you can understand it. You can get a lot of benefit after read this book. This particular book exist new understanding the information that exist in this guide represented the condition of the world at this point. That is important to yo7u to find out how the improvement of the world. This specific book will bring you inside new era of the internationalization. You can read the e-book on the smart phone, so you can read the item anywhere you want.

Suzanne Macdougall:

The reason why? Because this Post-parametric Automation in Design and Construction is an unordinary book that the inside of the publication waiting for you to snap the idea but latter it will surprise you with the secret this inside. Reading this book alongside it was fantastic author who also write the book in such incredible way makes the content inside of easier to understand, entertaining technique but still convey the meaning fully. So , it is good for you for not hesitating having this any more or you going to regret it. This phenomenal book will give you a lot of positive aspects than the other book possess such as help improving your proficiency and your critical thinking approach. So , still want to hesitate having that book? If I were being you I will go to the guide store hurriedly.

Harold Riggs:

Reading a book for being new life style in this 12 months; every people loves to examine a book. When you learn a book you can get a wide range of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what forms of book that you have read. If you would like get information about your review, you can read education books, but if you act like you want to entertain yourself read a fiction books, such us novel, comics, in addition to soon. The Post-parametric Automation in Design and Construction will give you a new experience in reading through a book.

Erin Harmon:

A lot of book has printed but it differs. You can get it by web on social media. You can choose the best book for you, science, comedian, novel, or whatever through searching from it. It is known as of book Post-parametric Automation in Design and Construction. You'll be able to your knowledge by it. Without causing the printed book, it could possibly add your knowledge and make you happier to read. It is most critical that, you must aware about guide. It can bring you from one destination for a other place.
