Interaction of Electromagnetic Waves and Electron Beams with Plasmas: Theoretical study of nonlinear plasma physics

D. N. Gupta

Interaction of Electromagnetic Waves and Electron Beams with Plasmas: Theoretical study of nonlinear plasma physics D. N. Gupta

With the advent of laser and maser, the wave-plasma interaction emerged as a major rich field of research. To explore the possibility of laser driven fusion, laser-plasma interaction became a subject of worldwide research, revealing many novel nonlinear phenomena including generation and saturation of plasma instabilities, electron acceleration, and ion Coulomb explosion. The work presented in this thesis is related to intense laser-plasma and electron beam-plasma interaction. The development of intense short pulse laser and high current, high-energy electron beams has allowed exploration of new regimes of laser and beam plasma interaction. Enormous progress has been made in inertial confinement fusion, plasma heating, X-ray lasers, free electron laser and charged particle accelerators. In these applications parametric instabilities, self-focusing, self phase modulation and other non-linear phenomena are important. The present thesis deals with these phenomena. This work is relevant to laser-driven fusion, charged particle acceleration, and laboratory plasma heating.

From reader reviews:

William Leighty:

Reading a guide can be one of a lot of pastime that everyone in the world enjoys. Do you like reading book and so. There are a lot of reasons why people like it. First reading a publication will give you a lot of new data. When you read a publication you will get new information mainly because book is one of a number of ways to share the information or maybe their idea. Second, examining a book will make an individual more imaginative. When you looking at a book especially fictional works book the author will bring you to definitely imagine the story how the character types do it anything. Third, you are able to share your knowledge to some others. When you read this Interaction of Electromagnetic Waves and Electron Beams with Plasmas: Theoretical study of nonlinear plasma physics, it is possible to tells your family, friends along with soon about yours book. Your knowledge can inspire different ones, make them reading a book.

Nicole Rockwood:

Do you have something that you enjoy such as book? The book lovers usually prefer to select book like comic, quick story and the biggest some may be novel. Now, why not hoping Interaction of Electromagnetic Waves and Electron Beams with Plasmas: Theoretical study of nonlinear plasma physics that give your enjoyment preference will be satisfied through reading this book. Reading behavior all over the world can be said as the opportunity for people to know world a great deal better then how they react towards the world. It can't be said constantly that reading habit only for the geeky person but for all of you who wants to possibly be success person. So , for all you who want to start reading as your good habit, you are able to pick Interaction of Electromagnetic Waves and Electron Beams with Plasmas: Theoretical study of nonlinear plasma physics become your starter.

Jesus Novak:

Your reading 6th sense will not betray anyone, why because this Interaction of Electromagnetic Waves and Electron Beams with Plasmas: Theoretical study of nonlinear plasma physics reserve written by well-known writer who really knows well how to make book that may be understand by anyone who read the book. Written with good manner for you, still dripping wet every ideas and producing skill only for eliminate your own personal hunger then you still hesitation Interaction of Electromagnetic Waves and Electron Beams with Plasmas: Theoretical study of nonlinear plasma physics as good book not simply by the cover but also by the content. This is one reserve that can break don't determine book by its handle, so do you still needing an additional sixth sense to pick this kind of!? Oh come on your reading through sixth sense already told you so why you have to listening to another sixth sense.

Anthony Lucas:

Many people spending their time by playing outside along with friends, fun activity along with family or just watching TV the entire day. You can have new activity to invest your whole day by studying a book. Ugh,

do you consider reading a book can definitely hard because you have to use the book everywhere? It alright you can have the e-book, taking everywhere you want in your Mobile phone. Like Interaction of Electromagnetic Waves and Electron Beams with Plasmas: Theoretical study of nonlinear plasma physics which is getting the e-book version. So , why not try out this book? Let's see.
