Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series)

Robert E. Schapire, Yoav Freund

Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) Robert E. Schapire, Yoav Freund

Boosting is an approach to machine learning based on the idea of creating a highly accurate predictor by combining many weak and inaccurate "rules of thumb." A remarkably rich theory has evolved around boosting, with connections to a range of topics, including statistics, game theory, convex optimization, and information geometry. Boosting algorithms have also enjoyed practical success in such fields as biology, vision, and speech processing. At various times in its history, boosting has been perceived as mysterious, controversial, even paradoxical. This book, written by the inventors of the method, brings together, organizes, simplifies, and substantially extends two decades of research on boosting, presenting both theory and applications in a way that is accessible to readers from diverse backgrounds while also providing an authoritative reference for advanced researchers. With its introductory treatment of all material and its inclusion of exercises in every chapter, the book is appropriate for course use as well. The book begins with a general introduction to machine learning algorithms and their analysis; then explores the core theory of boosting, especially its ability to generalize; examines some of the myriad other theoretical viewpoints that help to explain and understand boosting; provides practical extensions of boosting for more complex learning problems; and finally presents a number of advanced theoretical topics. Numerous applications and practical illustrations are offered throughout.

From reader reviews:

Eva Stanfield:

This Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) are generally reliable for you who want to become a successful person, why. The reason of this Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) can be one of the great books you must have will be giving you more than just simple examining food but feed a person with information that probably will shock your previous knowledge. This book is definitely handy, you can bring it almost everywhere and whenever your conditions both in e-book and printed ones. Beside that this Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) forcing you to have an enormous of experience such as rich vocabulary, giving you trial run of critical thinking that we know it useful in your day activity. So , let's have it and luxuriate in reading.

Jesus Reeves:

Do you have something that you like such as book? The publication lovers usually prefer to decide on book like comic, short story and the biggest one is novel. Now, why not hoping Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) that give your enjoyment preference will be satisfied by simply reading this book. Reading behavior all over the world can be said as the way for people to know world much better then how they react in the direction of the world. It can't be claimed constantly that reading behavior only for the geeky particular person but for all of you who wants to end up being success person. So , for all you who want to start reading through as your good habit, you can pick Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) become your personal starter.

Peggy Ross:

Your reading 6th sense will not betray you actually, why because this Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) book written by well-known writer who knows well how to make book that may be understand by anyone who all read the book. Written throughout good manner for you, dripping every ideas and creating skill only for eliminate your personal hunger then you still uncertainty Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) as good book not just by the cover but also from the content. This is one reserve that can break don't judge book by its include, so do you still needing an additional sixth sense to pick this!?. Oh come on your reading sixth sense already alerted you so why you have to listening to another sixth sense.

Melissa Sands:

The book untitled Boosting: Foundations and Algorithms (Adaptive Computation and Machine Learning series) contain a lot of information on that. The writer explains the woman idea with easy means. The language is very straightforward all the people, so do not really worry, you can easy to read it. The book was

compiled by famous author. The author will bring you in the new time of literary works. It is easy to read this book because you can please read on your smart phone, or gadget, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can open up their official website and also order it. Have a nice examine.
