Designing a Research Project: Second Edition Piet Verschuren, Hans Doorewaard

Using insights, guiding principles, and methodologies, this book shows graduate students and doctoral candidates how to develop an effective research design. With numerous examples, the reader is gradually introduced to the creative process. At the conclusion of each chapter, a step-by-step plan of action is presented, which should be followed when designing a research project. Now in its second edition, the book includes several important adjustments, modifications, and additional sections. The authors have extended the presentation of the practice-oriented research types, which are based upon the distinct phases of the intervention cycle. In addition, the technique of unraveling key concepts is further specified. Numerous examples have been updated in order to present the reader with a wide variety from many different social sciences. An extended series of assignments have been included, offering multiple opportunities to test knowledge and to practice skills in designing a research project. The Appendix provides a thorough discussion for designing conceptual (causal) models. The book will help the reader master the difficult, yet very important, subject of developing and applying these models.
