Probability for Statistics and Machine Learning: Fundamentals and Advanced Topics (Springer Texts in Statistics)

Anirban DasGupta

Probability for Statistics and Machine Learning: Fundamentals and Advanced Topics (Springer Texts in Statistics) Anirban DasGupta

This book provides a versatile and lucid treatment of classic as well as modern probability theory, while integrating them with core topics in statistical theory and also some key tools in machine learning. It is written in an extremely accessible style, with elaborate motivating discussions and numerous worked out examples and exercises. The book has 20 chapters on a wide range of topics, 423 worked out examples, and 808 exercises. It is unique in its unification of probability and statistics, its coverage and its superb exercise sets, detailed bibliography, and in its substantive treatment of many topics of current importance.

This book can be used as a text for a year long graduate course in statistics, computer science, or mathematics, for self-study, and as an invaluable research reference on probability and its applications. Particularly worth mentioning are the treatments of distribution theory, asymptotics, simulation and Markov Chain Monte Carlo, Markov chains and martingales, Gaussian processes, VC theory, probability metrics, large deviations, bootstrap, the EM algorithm, confidence intervals, maximum likelihood and Bayes estimates, exponential families, kernels, and Hilbert spaces, and a self contained complete review of univariate probability.

From reader reviews:

Willard Sarvis:

Book will be written, printed, or created for everything. You can recognize everything you want by a book. Book has a different type. As it is known to us that book is important factor to bring us around the world. Close to that you can your reading talent was fluently. A book Probability for Statistics and Machine Learning: Fundamentals and Advanced Topics (Springer Texts in Statistics) will make you to be smarter. You can feel more confidence if you can know about every little thing. But some of you think which open or reading any book make you bored. It is not make you fun. Why they could be thought like that? Have you looking for best book or appropriate book with you?

Steven Hackett:

In this 21st one hundred year, people become competitive in most way. By being competitive today, people have do something to make these people survives, being in the middle of typically the crowded place and notice by surrounding. One thing that at times many people have underestimated that for a while is reading. Sure, by reading a e-book your ability to survive increase then having chance to stand up than other is high. For you personally who want to start reading the book, we give you that Probability for Statistics and Machine Learning: Fundamentals and Advanced Topics (Springer Texts in Statistics) book as basic and daily reading guide. Why, because this book is greater than just a book.

Ella Norman:

Beside this particular Probability for Statistics and Machine Learning: Fundamentals and Advanced Topics (Springer Texts in Statistics) in your phone, it might give you a way to get nearer to the new knowledge or data. The information and the knowledge you might got here is fresh in the oven so don't end up being worry if you feel like an aged people live in narrow town. It is good thing to have Probability for Statistics and Machine Learning: Fundamentals and Advanced Topics (Springer Texts in Statistics) because this book offers to you readable information. Do you occasionally have book but you don't get what it's facts concerning. Oh come on, that won't happen if you have this within your hand. The Enjoyable blend here cannot be questionable, similar to treasuring beautiful island. So do you still want to miss the item? Find this book in addition to read it from now!

Elizabeth Acker:

What is your hobby? Have you heard that question when you got scholars? We believe that that query was given by teacher to their students. Many kinds of hobby, All people has different hobby. And you also know that little person similar to reading or as reading through become their hobby. You have to know that reading is very important and book as to be the thing. Book is important thing to include you knowledge, except your current teacher or lecturer. You get good news or update with regards to something by book. Numerous books that can you go onto be your object. One of them is niagra Probability for Statistics and Machine
