## Classical Electrodynamics: From Image Charges to the Photon Mass and Magnetic Monopoles (Undergraduate Lecture Notes in Physics) Francesco Lacava

This book proposes intriguing arguments that will enable students to achieve a deeper understanding of electromagnetism, while also presenting a number of classical methods for solving difficult problems. Two chapters are devoted to relativistic electrodynamics, covering all aspects needed for a full comprehension of the nature of electric and magnetic fields and, subsequently, electrodynamics. Each of the two final chapters examines a selected experimental issue, introducing students to the work involved in actually proving a law or theory. Classical books on electricity and magnetism are mentioned in many references, helping to familiarize students with books that they will encounter in their further studies. Various problems are presented, together with their worked-out solutions. The book is based on notes from special lectures delivered by the author to students during the second year of a BSc course in Physics, but the subject matter may also be of interest to senior physicists, as many of the themes covered are completely ignored or touched only briefly in standard textbooks.

### **From reader reviews:**

#### **Lucia Stevenson:**

Inside other case, little persons like to read book Classical Electrodynamics: From Image Charges to the Photon Mass and Magnetic Monopoles (Undergraduate Lecture Notes in Physics). You can choose the best book if you appreciate reading a book. Provided that we know about how is important some sort of book Classical Electrodynamics: From Image Charges to the Photon Mass and Magnetic Monopoles (Undergraduate Lecture Notes in Physics). You can add expertise and of course you can around the world with a book. Absolutely right, due to the fact from book you can understand everything! From your country till foreign or abroad you will find yourself known. About simple matter until wonderful thing it is possible to know that. In this era, we can easily open a book or perhaps searching by internet system. It is called e-book. You need to use it when you feel uninterested to go to the library. Let's go through.

#### **Willie Adams:**

Reading a guide can be one of a lot of exercise that everyone in the world really likes. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a reserve will give you a lot of new data. When you read a e-book you will get new information since book is one of many ways to share the information or maybe their idea. Second, reading a book will make an individual more imaginative. When you examining a book especially fiction book the author will bring that you imagine the story how the people do it anything. Third, it is possible to share your knowledge to some others. When you read this Classical Electrodynamics: From Image Charges to the Photon Mass and Magnetic Monopoles (Undergraduate Lecture Notes in Physics), you can tells your family, friends in addition to soon about yours publication. Your knowledge can inspire average, make them reading a publication.

#### **Michael Grammer:**

Playing with family within a park, coming to see the marine world or hanging out with buddies is thing that usually you might have done when you have spare time, then why you don't try matter that really opposite from that. Just one activity that make you not feeling tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Classical Electrodynamics: From Image Charges to the Photon Mass and Magnetic Monopoles (Undergraduate Lecture Notes in Physics), you are able to enjoy both. It is good combination right, you still desire to miss it? What kind of hang type is it? Oh come on its mind hangout people. What? Still don't understand it, oh come on its referred to as reading friends.

#### **David Murray:**

Beside this specific Classical Electrodynamics: From Image Charges to the Photon Mass and Magnetic Monopoles (Undergraduate Lecture Notes in Physics) in your phone, it could possibly give you a way to get more close to the new knowledge or info. The information and the knowledge you may got here is fresh from

your oven so don't become worry if you feel like an old people live in narrow small town. It is good thing to have Classical Electrodynamics: From Image Charges to the Photon Mass and Magnetic Monopoles (Undergraduate Lecture Notes in Physics) because this book offers to you personally readable information. Do you sometimes have book but you rarely get what it's about. Oh come on, that would not happen if you have this in your hand. The Enjoyable set up here cannot be questionable, similar to treasuring beautiful island. Use you still want to miss the item? Find this book as well as read it from now!
